

HARI AM

DIE DESIGN ENGINEER - AUTOMOTIVE

📍 Ajman, United Arab Emirates ✉ harimosco@gmail.com ☎ +971542541314 🌐 in/amhari007

PROFESSIONAL SUMMARY

Design Engineer with 8+ years of experience in press tool design and acrylic fabrication for automotive and display applications. Strong skills in concept design, strip layout, machining processes, and troubleshooting tooling issues on the shop floor. Proficient in CAD tools including Catia V5, AutoCAD, Solid Works, and UG NX, with hands-on exposure to precision inspection tools and CNC/laser workflows.

SKILLS

- Press tool design: Progressive, blanking, drawing, trimming dies.
- Tool and die: Jigs, fixtures, maintenance, breakdown and preventive maintenance.
- CAD software: Catia V5, AutoCAD, SolidWorks, UG NX.
- Manufacturing processes: Machining, CNC and laser cutting, assembly, trials.
- Inspection and gauging: CMM, vernier caliper, micrometer, dial gauge, slip gauge, height master.
- Process engineering: Process sequence, strip layout, design calculations, press selection.
- Costing and estimation: Cost estimates, quotations, material selection.
- Soft skills: Communication, teamwork, independent working, problem solving.

EXPERIENCE

Design Engineer

FABRICON INTERNATIONAL FZE, Ajman, UAE
Nov 2024 – Present.

- Design and develop acrylic display units, light boxes, domes, and custom installations for retail and automotive applications.
- Prepare detailed 2D and 3D drawings and cutting layouts for CNC and laser machines using CAD tools.
- Conduct quality checks to ensure high finishing standards and dimensional accuracy of fabricated parts.
- Recommend material thickness and structural design for durability and cost effectiveness, and prepare cost estimates and quotations.

Design Engineer

R&W TOOLING SOLUTION PVT LTD, Pune, India
Jun 2022 – Oct 2024

- Designed different types of press tools, including progressive, blanking, drawing, and trimming dies for automotive components.
- Evaluated design feasibility considering functionality, manufacturability, and tooling constraints.
- Defined process sequence, burr side, strip layout, design calculations, and press selection for new tools.
- Provided process engineering support to tool manufacturing personnel on the shop floor and maintained engineering files.
- Collaborated with estimators on initial layout concepts and cross checked designs, providing suggestions to co-designers.

Tool and Die Engineer

AL- ALWAN PRECISION MOULDING DIES IND LLC, Shariah, UAE

Nov 2020 – Dec 2021

- Interpreted and executed technical drawings and job specifications for mould and dies.
- Planned and monitored design work to meet target timelines, coordinating with manufacturing and assembly teams.
- Followed up on manufacturing, assembly, and tool trials, including inspection of production parts.
- Set up and adjusted work related machines and tools to achieve required tolerances

Tool and Die Maker

SUNIKH COMPONENTS PVT LTD, Bangalore, India

Jul 2017 – Sep 2020

- Performed preventive and breakdown maintenance of tools and dies in a production environment.
- Operated conventional and non conventional machines for machining tool components.
- Analyzed machined job accuracy using precision measuring instruments such as CMM, vernier caliper, micrometer.
- Attended tool trials to identify issues and supported root cause analysis and problem resolution.

EDUCATION

Diploma in Tool & Die Engineering

Government Polytechnic College, Kunnankulam, Kerala, India

2013 – 2017

Higher Secondary Education (Science - Biology)

Aleemul Islam HSS Padoor, Kerala, India

2012 – 2013

SSLC (10th)

St. Sebastian High School, Chittattukara, Thrissur, Kerala, India

2010 – 2011

CERTIFICATION & TRAINING

- SolidWorks Authorized Training – Mantra Leistung / Authorized Training Center, Bangalore, India.
- Training in Auto CAD, Solid Works, design concepts, and standard methodologies for tooling
